Mobility

L'Espace Grenelle, the reference showcase on the electric distribution network's future:

- > receiving a diversified audience: institutional and business partners, customers, students...
- > showing customers the new advantages offered by the Linky smart meter: following of the consumption, management of the devices, charging of the electric vehicle...
- > presenting concretely how Enedis contributes to the energy transition (renewable energy, electric vehicle, demand response for peak-shifting...)
- > illustrating innovation capacities of the french industrial sector (SMEs SMI, big companies, universities, research centers...)
- > opening to other visits and experimentation centers (Nice, Lyon...)
